GO over−representation analysis for biological process
oligodendrocyte differentiation
ensheathment of neurons
axon ensheathment
glial cell differentiation
gliogenesis
central nervous system myelination
axon ensheathment in central nervous system
oligodendrocyte development
glial cell development
myelination
axonogenesis
axon development
positive regulation of myelination
myelin maintenance
positive regulation of nervous system process
regulation of myelination
neutrophil migration
regulation of nervous system process
granulocyte migration
plasma membrane organization
